

Because everyone is
Unique.

Tailor-made health
screening services
specially for you.

Screen for
High Vitality

Screen for
Awareness

Screen for a
Peace of Mind

Benefits

*Preventive health screening
starts early
and continues
throughout life.*

At Parkway Shenton, we tailor health screening packages based on your age, gender, medical history, risk factors, lifestyle factors, family history and health concerns.

Enjoy peace of mind with delivery of screening results in the form of **customised reports** via **MyHealth360 app**.

Create health trends and **keep track of your tests results** over time.

Benefit from a **full, targeted review** that includes lifestyle recommendations and health advice.

We provide a **one-stop experience** with direct access to our specialists, facilities and additional medical services under the IHH Singapore network, if you require medical intervention.

Add-on Tests

Enhanced tests and services available upon request – do enquire with our clinics.

Vaccinations

- Influenza Vaccine
- Hepatitis Vaccine
- Human Papillomavirus (HPV) Vaccine
- Pneumococcal Vaccine
- Others

Advanced Imaging Modalities

- Low Dose CT Lung Screen
- CT Calcium Scoring
- CT Coronary Angiogram
- MRI Stroke Screen
- MRI Lumbar / Cervical Spine
- MRI Liver Elastography

Blood Tests

- Allergy Tests (Food and Inhalant)
- Genetic Testing (Cancer Risk)*
- Tumour Marker for Stomach (GASTROClear)

* Offered in collaboration with partner laboratories

Immunology and Serology Tests

- STDs e.g. Syphilis, Anti-HIV
- Mumps, Measles, Rubella
- Varicella-Zoster Virus (Chicken Pox / Shingles)

Specialist Tests

- 2D Echocardiogram
- Gastroscopy and Colonoscopy
- Nasoendoscopy

Others

- Audiometry (selected Executive Health Screeners)
- Digital Brain Function Scan
- Spirometry
- GATOR Prime#

Only available at Mount Elizabeth Novena Hospital

Add-on Tests

Pre-screening Guidelines

In order for us to serve you better, please secure your preferred timing by booking an appointment in advance.

As some tests require fasting (e.g. blood tests and ultrasound abdomen), please **abstain from food and drinks for at least 8 hours** before your scheduled appointment. Drinking plain water is allowed during the fasting period. Light refreshments will be provided after your fasting tests.

Please be **punctual** for your appointment to avoid a longer waiting time.

Urine and stool sample kits are available for collection before your appointment at any of our Executive Health Screeners clinics. Alternatively, the kits will be provided on the day of your screening.

Tests that require prior specialist and facility booking are subjected to availability on the screening date.

Colonoscopy requires additional preparation and will be performed after screening date.

Gastroscopy and Colonoscopy may incur additional charges for removal and diagnosis of polyps. These charges apply even if the endoscopy is included as part of the screening package.

Our doctors are happy to provide a **detailed explanation of your screening results and health advice** on a review appointment. Your report will be sent to you digitally via MyHealth360 mobile app and email.

Medical Advisory

1 Fast overnight for at least 8-10 hours (sips of water is allowed) before coming for your health screen.

Fasting allows our medical team to test the fasting blood sugar and the fasting serum triglyceride levels and allows us to compare with past results if any. Without proper fasting, food in the stomach may obscure organs during the ultrasound study of the abdomen.

2 For High Blood Pressure patients

A) Beta blockers

If you are taking a Beta-Blocker, stop this drug for 1-2 days. If you are uncertain what a beta-blocker is, consult your doctor. Common Beta Blockers (pharmacological names) are *Atenolol*, *Metoprolol*, *Propranolol*, *Carvedilol*, *Sotalol*, *Bisoprolol (Concor)* and *Nebivolol (Nebilet)* or in combination drugs containing *Atenolol* or *Bisoprolol*.

B) Other drugs that are not beta blockers

If you are taking your medications at night, continue to take at night.

If you are taking your medications in the morning, please continue taking them with plain water. This will enable us to check if your blood pressure is under control with the medication and also allows for us to proceed with the treadmill stress test if required.

C) Should your blood pressure exceed 150 / 90 mmHg on the day of treadmill stress test, the test will have to be postponed until the blood pressure is under the maximum limit.

3 For Diabetic patients

You may stop your diabetes and / or other medications on the day of your health screen. However, if you have Type 1 diabetes mellitus and are on insulin injections, please first consult your doctor or contact us for further advice.

4 Caffeinated drinks

Do not drink caffeinated drinks (coffee, tea) before test or eat heavily before the treadmill stress test.

5 CT / MRI Scan

If you are allergic to any radio-contrast material or have impaired kidney function, please inform your doctor as the CT Scan / MRI Scan with contrast may not be performed. If you have metallic objects in or on your body, please inform your doctor as the MRI may not be done. Titanium implants are allowed.

6 Gastroscopy / Colonoscopy

If you are on blood thinners and are going for Endoscopy – stomach or colon, please consult your Cardiologist / GP early regarding stopping your medication prior to the procedure. This is to prevent any excessive bleeding when polyps are removed or biopsies are taken.

7 Females

Urine and stool and pap smear tests should be done at least 5 days after your period to avoid contamination. Tumour markers should not be done during menstruation.

8 Urea Breath Test

Complete antibiotics treatment 4 weeks before test date.

Stop taking gastric medications (e.g. proton pump inhibitors such as Omeprazole, or H2 receptor blockers such as Famotidine, or Bismuth) for at least 2 weeks before the test date.

Antacids and other medications with acid neutralizing effect should be avoided on the day of test.

Disclaimers

Health screening may have both false positive and false negative results and may not pick up all occult diseases. Any abnormal finding may need further investigations or a referral to a Specialist.

Checklist

Please remember the following to maximise your experience at our health screening centre.

-  Bring all past medical reports, scans and medications.
-  Bring your identification documents for registration (i.e. NRIC, passport, company letter or staff pass).
-  Bring your spectacles for the vision tests. Do not wear contact lenses.
-  Wear a two-piece outfit (for women).
-  Bring sports attire for the treadmill test. We will provide sports shoes and socks upon request.
